

Patient Assist Armrests

(UMF Item Number -041)

Putting a new “spin” on power exam table armrests!

Up until now, an armrest was an armrest. That's no longer true with the Patient Assist Armrests from UMF. Unlike competitors' power table armrests, the UMF Patient Assist Armrest rotates a full 360 degrees with the press of a button and can be locked into any position.

In their fully upright position, Patient Assist Armrests provide a comfortable and relaxed position in which patients can rest their arms.

In their fully lowered position, Patient Assist Armrests allow unrestricted access between the healthcare provider and the patient.

Rotated 90 degrees forward, in combination with the low access height of the 4010, 4011, 4040 and 4070 power exam tables, Patient Assist Armrests serve as a stable foundation for patients with limited mobility while moving to and from the exam table. In the forward position, Patient Assist Armrests also simplify transfers to and from wheelchairs and walkers.

Patient Assist Armrests from UMF, the perfect cure for the common armrest!

- Fits UMF Model 4010, 4011, 4040, and 4070 power exam tables
- Rugged, functional and practical
- 360 degree rotation
- Easy access to and from chair
- Will not inhibit healthcare provider's access to patient
